Good afternoon,

I have requested that the lights be temporarily removed in the next couple of weeks. As soon as I hear back, I will give you an exact date.

Exciting times.

Best regards,

Lorena, ultimately any festoon light that is anchored to a street light surrounding the site needs to be removed so that we can pull the street lights down temporarily.

Thanks Lorena,

Good afternoon,

Are you going to need the lights removed from 5th and 6th Streets? What about Palos Verdes?

Lorena,

See email from Ryan Guthrie, from Holland Partners. They will commenced construct activities for the 360-unit apartments at 550 S. Palos Verdes in the next few weeks. To accomodate cranes at the site, some of the street lights along 5th, 6th and Palos Verdes Street will need to be removed, along with the Tivoli lights. Is the BID responsible for the maintenance of the Tivoli lights? Can you assist/coordinate with Ryan on their temporary removal?

Thanks,

David

David,

The 550 PV site will be mobilizing in July (likely with demo starting in July) and then we are off to the races later in summer. This project is slated for construction end of 2019-start of 2020 when we will begin to occupy the building. Attached is a preliminary site plan showing the lanes/sidewalks we are trying to close, and below is a rough idea of the two tower cranes locations and their swing radiuses (bottom of the image is PV street, right of image is 6th, left of image is 5th). We will need to temporarily remove the street lights along our perimeters but the festoon lights currently strung up are attached to these streetlights. All of these items will be in conflict with our crane picking operations. How can we get these festoon lights removed so that we can proceed with temporarily taking down the street lights? Tower cranes likely won't begin erection until end of this year - but it would be great to get this process going as soon as possible.
